

## "What is in-line galvanizing?"

The protection of Allied's steel tubing comes from an inline hot-dip galvanizing process. Our signature process produces superior corrosion resistance by utilizing a triple-layer of protection. First 99.99% pure zinc is applied, followed by a conversion coating. Finishing the process is a clear organic topcoat that seals in the protection and produces a smooth, shiny appearance. This galvanizing process is performed on the mill to produce a finished product that does not require secondary operations such as batch hot-dip galvanizing.

The advanced processing technique of in-line galvanizing was first introduced by Allied back in 1959. Allied Tube has successfully employed these techniques to transform industry and product standards.

Requirement: Durable, easy to install round sign system, complementing square and channel supports.

**Fulfillment:** Telespar round sign system with socket and wedge.

> The Telespar round sign system with socket and wedge provides superior corrosion resistance and strength benefits,

demonstrating 50ksi yield strength resulting from Allied's signature inline galvanizing process (see sidebar for details). This highly durable product enables you to reduce replacement and repair costs caused by standard wear and tear.

The limited number of components makes it easy to install. Simply drive the tubular socket into the ground, insert the signpost and add the wedge. The socket and wedge system makes it easy to re-use and hard to vandalize.

## **Round Sign System Specifications**

O.D./Gauge	Wall Thickness(inches)	Weight(Lbs./Foot)
2.375" x 10	0.134	3.2101
2.375" x 12	0.109	2.6404
2.375" x 13	0.095	2.3155
2.375" x 14	0.083	2.0336
2.375" x 16	0.065	1.6051
2.875" x 12*	0.109	3.1444

<sup>\*</sup> Used for Anchors

Stocked in 10'and 12' lengths. Other lengths available upon request. Available with pre-punched holes. Contact your rep for custom hole patterns.

To fulfill your round sign system needs, contact the Allied Tube & Conduit Traffic Products Group at 800-882-5543.
