

Metro™ VMS

Compact Variable Message Signs

Small footprint, energy efficiency and superior performance.

Compact message signs designed for metropolitan areas

- Compact trailer fits almost anywhere
- Full-matrix message display in two sizes
- Optional 5-color display
- Touchscreen controller with intuitive interface

The Metro™ Variable Message Signs are our most compact portable message signs, designed for use in metropolitan areas. Metro signs feature a full matrix of high-efficiency LEDs for reduced energy consumption, superior performance and outstanding legibility.

The compact Metro trailer is easy to maneuver and deploy, particularly in urban areas where traffic is heavy and space is limited. The full-matrix display can present messages as text, graphics or a combination of both, for traffic safety, emergency response and special events. Two sizes of displays are available, and a five-color display is available in the larger size.

For optimal positioning, the display cabinet rotates independent of the trailer, and its height is fully adjustable. Metro signs use our touchscreen interface for the easiest programming in the industry.

Optional auxiliary equipment includes radar-based speed detection, the Wanco Traffic Data Classifier System and a cellular modem package with GPS and remote control. Additional solar panels and batteries are available if more power is required.

To see or order the Metro VMS, call **800.972.0755** or visit **wanco.com**.

The Metro's compact trailer is easier to maneuver than a full-size sign

Metro signs feature an easy-to-use touchscreen controller
